General notice--The American Geophysical Union welcomes papers and discussions on the various geophysical subjects for publication from members and non-members alike. It reserves the right, however, to reject either papers or discussions in whole or in part and in all cases these are edited by the Editorial and Publication Committee. Manuscripts should be transmitted in triplicate to the American Geophysical Union, 1530 P Street, Northwest, Washington 5, D. C., and also proofs and all correspondence concerning papers.

It is the responsibility of each author to prepare his material in logical and attractive form, so that it may be read by a specialist in the particular field without need of interpolating the author's intention. To this end, a circular entitled "Suggestions to authors on preparation of manuscripts for publication in the Transactions of the American Geophysical Union" has been prepared and will be supplied interested persons upon request. Reports and papers should be concise. Historical summaries of previous results and comments that do not lead to definite conclusions should be brief. The amount of detail included should be governed by the importance of the results and of their interest to geophysicists.

The Transactions include several departments, as follows:

(1) Scientific and technical papers
(2) Discussions of papers under (1)
(3) Progress reports
(4) Letters to Editor
(5) Reviews, Abstracts, Bibliography
(6) Notes, Personalia, Corrigenda
(7) Union, Section, and Committee Activities

All matters for (1) should have a definite scientific or technical interest and should develop aspects of the geophysical sciences. Matter for (2) may be submitted for publication within the limiting date set at the close of each paper. Items of temporary interest will ordinarily not appear in (1) but in (3) or (4).

The American Geophysical Union is not responsible for statements made, or conclusions drawn, by contributors.

Return of copy for illustrations--All illustrative material, including any negatives supplied to, or prepared by, the Union, will be returned to authors if request accompanies manuscript; otherwise such copy will be destroyed upon publication of Transactions in which they are printed.

Reprints--Reprints will be furnished at cost to an author provided order is received when corrected proof is returned. When an order is accompanied by remittance in full, reprints will be sent post or express paid; otherwise cost of forwarding will be added to cost of reprints.

Rates of subscription to non-members

Per annual Volume of six Numbers, in advance	$7.50
Per single current Number	1.50

Available back issues and Volumes as per Price-List to Non-Members

Communications regarding subscriptions, orders, and changes of address should be sent to the American Geophysical Union, 1530 P Street, Northwest, Washington 5, D. C.
